Products & Services

Advancing health, together

For over 70 years, we've specialized in the development and manufacturing of world-class reagents, both native and recombinant, helping IVD and life science teams transform scientific innovation into trusted, life-saving diagnostics.

Across our portfolio, from antibodies, enzymes, and antigens to complex conjugates and custom solutions, every product is developed with precision to support performance, regulatory compliance, and diagnostic accuracy.

But it's not just about the products. We know what's at stake. That's why our scientists work shoulder-to-shoulder with yours, solving challenges, refining performance, and accelerating progress from concept to commercialization. Our continued investment in next-generation recombinant technologies reflects that commitment: enabling you to bring diagnostics and life science solutions to market faster with great confidence, resilience, and sustainability.

As you explore this brochure, we hope you'll see what sets BBI apart - not just in what we make, but in how we show up as your partner.

Welcome to BBI. Let's advance health, together.

Alex Socarrás
Group CEO

Human & serology antigens

Over decades, we've built one of the industry's broadest antigen portfolios – covering critical markers in autoimmunity, diabetes, allergy, cardiac, tumor, hormonal, renal, and more – so you can source every critical target from one ISO 13485-certified, global partner.

Need a custom fit?

Our scientists will fine-tune any catalog antigen to your spec. Or you can take a native or recombinant target from feasibility through to full verification and manufacture using our custom development service.

Human
antigens

Disease Area	Product Name	Prod. Code (Pure)	Prod. Code (Part-pure)
Autoimmune / Inflammation	(α) alpha - 1 - antichymotrypsin (ACT)	P159-5	
	(α) alpha - 1 - antitrypsin (A1AT)	P165-5	
	(β) Beta-2-glycoprotein-1 (B2GP1)	P195-5	
	C-reactive protein (CRP)	P100-7N	
	Procalcitonin (PCT) (recombinant)	P742-1	
	Thyroglobulin (Tg)	P128-1	
	Thyroglobulin (Tg)	P128-0	
Cancer / Tumour	Alpha fetoprotein (AFP)	P109-3	
	Beta 2-microglobulin (β2M) recombinant	P701-1	
	CA125		P251-4
	CA15-3		P301-4
	CA19-9		P291-4
	Carcinoembryonic antigen (CEA)	P824-3	
	CYFRA 21-1		P246-4
	Neuron specific enolase (NSE)	P147-3	
	Prostate-specific antigen (PSA)	P117-7	P117-8
	Prostatic Acid Phosphatase	P116-1	
	PSA-ACT complex	P192-3	P192-9
			P189-9
Cardiac	Creatine kinase MM (CK-MM)		
	D-Dimer	P202-3	
	Galectin 3 (Gal-3) (recombinant)	P734-1	
	HbA1c Reagents for Boronate Aff & Immuno <3.5% low level	PS186-0	
	High-density lipoprotein (HDL)		P233-8
	Low-density lipoprotein (LDL)		P232-8
	Myoglobin (MYO)	P136-3	
	N-terminal prohormone brain natriuretic peptide (NT-Pro BNP)	P305-1	
	Triglyceride Concentrate	P235-8	
	Troponin complex (cTn)		P184-4
	Troponin I recombinant	P725-3	
	Troponin T recombinant	P724-3	
Hormones	Human chorionic gonadotropin (hCG)	P111-0	P111-6
	Prolactin recombinant	P700-1	
	Sex hormone-binding globulin (SHBG)	P145-5	P145-4
Immunoglobulins	IgG	P142-1	
	IgM	P141-5	
Infectious Disease	HIVp24	P714-3	
	Albumin (ALB)	P140-0	
	Ferritin	P103-7	
	HbA1c	PS186-9	PS186-0
	Prealbumin (Prealb)	P171-1	P171-2
	Transferrin receptor (TfR)		P185-9

Disease Area	Product Name	Prod. Code (Pure)	Prod. Code (Part-pure)
Plasma Proteins	Albumin	P714-3	
	Complement C4c		P151-8
	Thyroxine binding globulin (TBG)	P125-1	P125-2
Renal and Liver markers	Cystatin C (CysC)	P175-1	
	Cystatin C (recombinant)	P713-1	
	Lipocalin (NGAL) (recombinant)	P722-1	
	Retinol binding protein (RBP)	P124-1	
	α 1-microglobulin (α1M)	P121-1	
	Alpha 1 microglobulin (heat treated)	P121-9E	
Cell Culture additives	Apo Transferrin	T100-5	
	Holo Transferrin	T101-5	

Custom development
& manufacture
of antigens

Our custom antigen development service takes recombinant or native antigens from initial feasibility right through to verification.

If you can't find the antigens you are looking for, contact us today and we will do our best to provide a custom solution.

Feasibility

Optimization

Verification

Recombinant

- Screening of gene databases
- E. coli & Pichia
- Cloning
- Transformation
- Small scale fermentation

Native

- Sourcing of raw materials of human origin
- Small scale extraction and purification

Recombinant

- Optimized growth conditions
- Formulation
- Downstream processing
- Purification
- Fermentation capacity of 30L per batch

Native

- Large scale extraction
- Downstream processing purification

Native & Recombinant

- HPLC
- Western blot
- Protein electrophoresis
- IEF Gels
- Commercial autoanalysers
- Stability trials
- Validation

Serology antigens

BBI is one of the leading suppliers of recombinant and native antigens for autoimmune diagnostics, infectious disease serology, and allergy testing. Providing customers with products and services of the highest quality is our philosophy.

Therefore, all products are developed, produced and distributed according to a Quality Management System that is certified for compliance with EN ISO 13485 standards.

In addition, since September 2002, BBI has been listed as a manufacturer of multiple antigens in the database of the U.S. Food and Drug Administration (FDA).

Systemic Autoimmune Rheumatic Diseases

30300	50µg	DFS70
30301	1.0mg

Human chimeric antibodies

Immunoassays for the detection of antibodies in patient samples require reference materials to determine cut-off values and test assay integrity. These antibodies are then included in kits as calibrators or positive controls.

Human chimeric antibodies can serve as alternatives to characterized disease state plasma, which are limited in availability, show variability, and can have safety and ethical issues.

Enzymes

Built on a long legacy of enzyme innovation, we extract and purify native enzymes from microbial, plant, and animal sources – and also develop and manufacture recombinant forms.

When it comes to enzymes, we offer you unmatched scale. We're the world's largest global primary manufacturer of horseradish peroxidase (HRP) and a leading supplier of glucose oxidase (GO) – powering more than five billion glucose tests each year.

If you need something we don't yet offer, our custom development team can build and scale it for you.

Enzymes

For over 70 years, our products have been trusted in medical diagnostics, healthcare, and pharmaceuticals for their effectiveness and reliability. With international manufacturing and global distribution, BBI is your ideal partner for developing enzyme-based products, serving a diverse, worldwide customer base.

Quality guaranteed, whatever your requirement

Working within an increasingly regulated marketplace, BBI is compliant with the ISO 13485:2016 Quality Standard and have the capability of following processes compliant with Current Good Manufacturing Practice (cGMP) Standards.

Key enzyme products

Horseradish Peroxidase

Horseradish peroxidase (HRP) is one of the most commonly used enzyme labels for *in vitro* diagnostic assays.

Controlled & consistent supply – BBI has close and longstanding relationships with horseradish growers to ensure year-round supply.

High Isozyme C content – our HRP product options containing >90% Isozyme C which provides exceptional purity so you can have confidence in your results.

High activity levels – we achieve up to 250-300 U/mg, providing consistent and reliable performance.

Highly available amino groups – this allows for clean conjugation.

Bulk extraction and purification capabilities – large batch sizes allow us to fulfil multiple orders from a single batch, reducing validation costs.

Alkaline Phosphatase

ALP is the other enzyme of choice for *in vitro* diagnostic assay conjugates. ALP is often used as an alternative to HRP when a more linear reaction rate is required over a wide range of values. BBI's ALPI13G is our highest specific activity product and best-selling listing. Its performance has been proven in assays manufactured by some of the largest *in vitro* diagnostic assay and IVD companies.

Highest activity on the market – we achieve > 2500 glycine U/mg protein and 7000 DEA U/mg so you can be confident in the performance of your assay.

High stability – our product experiences <10% activity lost over 48 months, ensuring reliable and consistent performance of your assay.

Multiple grades of product – BBI offer ALP in a range of specific activities, including blocking grades, which allows you to pick the best product for your specific application.

Bulk extraction and purification capabilities – large batch sizes allow us to fulfil multiple orders from a single batch, reducing validation costs.

Glucose Oxidase

BBI are the worlds leading supplier of Glucose Oxidase for biosensor applications. Our GO is tried and tested and proven to perform in over 5 billion tests every year.

High levels of activity & purity – enabling rapid test times and reducing signal interference.

Choice & flexibility – we have multiple grades and custom preparations available for specific applications to optimise your assay at reduced cost.

Batch to batch reproducibility & consistency – optimized and controlled manufacturing procedures to ensure reproducibility and consistency – essential in high volume production.

Reliable source – with an established and reliable supply chain at the volumes you require to save validation time.

Core competencies

BBI is one of the world leaders in the manufacture and supply of high purity specialist enzymes and biochemicals to the diagnostic and pharmaceutical industries.

Extensive product range
Our product portfolio incorporates specific product grades to suit numerous applications.

Custom Manufacture
We undertake bulk custom manufacture of enzymes, whilst delivering to your exact specifications within a short lead time.

Stability
We produce highly stable enzyme preparations for customers. This is achieved through the use of quality raw materials, innovative production methodologies and product formulations developed to maximise stability.

Quality
We aim to develop, manufacture and supply high quality enzymes which are consistent with the expectations and requirements of our customers and meet applicable regulatory requirements.

	URE3	> 1300 Nessler U/mg protein			Jack Bean	Biosensor/Clinical Chemistry
Uricase	U5	> 4 U/mg material			Recombinant Escherichia coli	Biosensor/Clinical Chemistry

Custom development & manufacture of enzymes

In case BBI's off-the-shelf products do not meet your requirements, we offer a custom development and manufacturing service for enzymes.

- Feasibility**
- Small scale purification
 - Critical process parameters gained

- Development**
- Process optimization
 - Intermediate scale-up

- Verification**
- Routine protein analysis
 - Enzymes assays
 - Protein determinations
 - Analytical chromatography
 - SDS page
 - Isoelectric focusing
 - Develop protocols to ensure optimized yields

- Validation**
- Established manufacturing/testing processes
 - Consistent conformance to product specification

BBI capabilities

Specialists in sourcing and extraction of animal and plant products – we have extensive experience in sourcing raw materials worldwide

Salt/solvent fractionation – batch sizes of up to 5,000 litres

Chromatography – ion exchange chromatography, affinity chromatography, size exclusion chromatography, hydrophobic interaction chromatography

Crystallization – highly effective protein purification using solvent and aqueous media

Freeze drying – capability of 49 - 420 litres per cycle

Ultrafiltration – volumes of 2,500 - 30,000 litres

Quality control – in-process analysis and monitoring, development of assay/test procedures

Product handling/sampling – we offer special packing according to customer specifications

Antibodies

With BBI, you get a single, ISO 13485 certified partner for high-specificity monoclonals, robust polyclonals, and precision-matched capture-detector pairs that are used in leading ELISA and lateral flow tests.

BBI antibodies are tried, tested and trusted by leading laboratories globally. Our extensive portfolio covers major clinical areas and can be supplied in research or bulk volumes. Whether you need milligram or gram quantities, BBI delivers the sensitivity, specificity and documentation required for your area of focus.

Monoclonal antibodies

Anti-Human Ig - unconjugated

Product description	Product code	Target	Application
Human IgA Monoclonal Antibody	MAB217P	IgA	ELISA
Human Immunoglobulin ε (hu-IgE) Monoclonal Antibody	MAB114P	IgE	ELISA
Human IgE Monoclonal Antibody	MAB324P	IgE	ELISA
Human IgE Monoclonal Antibody	MAB325P	IgE	ELISA
Human IgG Heavy Chain Monoclonal Antibody	MAB142P	IgG	ELISA / IHC / WB
Monoclonal to Human IgG1 Monoclonal Antibody	MAB146P	IgG1	ELISA
Human IgG4 Fc Monoclonal Antibody	MAB154P	IgG4	ELISA / IHC / WB
Human IgG Fc Monoclonal Antibody	MAB218P	IgG	ELISA
Human IgG2 Monoclonal Antibody	MAB220P	IgG2	ELISA
Human IgG3 Monoclonal Antibody	MAB221P	IgG3	ELISA
Human IgM Monoclonal Antibody	MAB216P	IgM	ELISA
Human Ig Kappa Light Chain Monoclonal Antibody	MAB199P	Kappa	ELISA / WB
Human Ig Lambda Light Chain Monoclonal Antibody	MAB219P	Lambda	ELISA / WB

Anti-Tag Antibodies - unconjugated (controls)

Product description	Product code	Target	Application
His-tag	MAB230P	His	ELISA / WB
Polyethylene glycol (PEG)	MAB206P	PEG	ELISA
Goat Anti Biotin IgG, unconjugated Polyclonal Antibody	BP436-3	Biotin	

Tumor Markers

Product description	Product code	Target	Application	Capture / Detector
Human Osteopontin Monoclonal Antibody	MAB222P	OPN	ELISA	Capture / Detector Can be paired with MAB193P
Human Osteopontin, C-terminal Monoclonal Antibody	MAB197P	OPN	ELISA / WB	Capture / Detector Can be paired with MAB193P
Human Osteopontin, N-terminal Monoclonal Antibody	MAB193P	OPN	ELISA / WB	Capture / Detector Can be paired with MAB222P
Human Osteopontin, N-terminal Monoclonal Antibody	MAB194P	OPN	ELISA / WB	Capture / Detector Can be paired with MAB222P
CA15-3 Monoclonal Antibody	BM236-K6A5	CA15-3	ELISA / WB	Detector
CA15-3 Monoclonal Antibody	BM236-V2G9	CA15-3	ELISA / WB	Capture Can be paired with BM236-K6A5
CA19-9 Monoclonal Antibody	BM238-G6C8	CA19-9	ELISA / WB	Capture
Free PSA Monoclonal Antibody	MAB296P	PSA	ELISA	Capture
PSA Monoclonal Antibody	MAB291P	PSA	ELISA	Capture / Detector Can be paired with MAB292P
PSA Monoclonal Antibody	MAB292P	PSA	ELISA	Capture / Detector Can be paired with MAB291P
IGFBP3 Monoclonal Antibody	BM396-P6F9	IGFBP3	ELISA	Capture Can be paired with BM396-V3C7
IGFBP3 Monoclonal Antibody	BM396-V3C7	IGFBP3	ELISA	Detector Can be paired with BM396-P6F9

Monoclonal antibodies

Cardiac, Vascular & Diabetes Markers

Product description	Product code	Category	Application	Capture / Detector
Human Myeloperoxidase Monoclonal Antibody	MAB208P	Cardiac	ELISA	Capture Can be paired with MAB209P
Human Myeloperoxidase Monoclonal Antibody	MAB209P	Cardiac	ELISA	Detector Can be paired with MAB208P. MAB209 is also self-pairing.
Troponin I Monoclonal Antibody	MAB283P	Cardiac	ELISA	Detector
D Dimer Monoclonal Antibody (clone 3B6)	MAB341P	Cardiac	ELISA / LF / WB	ELISA = Detector, LF = Detector Can be paired with MAB323P
D-Dimer Monoclonal Antibody	MAB284P	Cardiac	ELISA	Detector Can be paired with MAB285P
D-Dimer Monoclonal Antibody	MAB285P	Cardiac	ELISA	Capture Can be paired with MAB284P
D-Dimer Monoclonal Antibody	MAB323P	Cardiac	ELISA / LF / WB	ELISA = Detector, LF = Detector Can be paired with MAB341P
Human Galectin 3 Monoclonal Antibody	BM451-K7H2	Cardiac	ELISA / WB	Detector Can be paired with BM451-N8E8
Human Galectin 3 Monoclonal Antibody	BM451-N8E8	Cardiac	ELISA / WB	Capture Can be paired with BM451-K7H2 or BM451-V7G5
Human Galectin 3 Monoclonal Antibody	BM451-V7G5	Cardiac	ELISA / WB	Detector Can be paired with BM451-N8E8
Human NT-proBNP Monoclonal Ab	BM449-P2F6	Cardiac		
Human NT-proBNP Monoclonal Ab	BM449-S2E1	Cardiac		
HbA1c Monoclonal Antibody	BM300-H2E2	Diabetes		
Haemoglobin Monoclonal Antibody	BM302-S6B9	Vascular		

Hormonal Markers

Product description	Product code	Category	Application	Capture / Detector
Cortisol Monoclonal Antibody	MAB215P	Metabolism	ELISA	
ACTH Monoclonal Antibody	BM445-S5B2	Metabolism		
Parathyroid Hormone Monoclonal Antibody	BM361-E4H3	Metabolism	ELISA	Detector
Human Chorionic Gonadotropin- Beta (hCG-Beta) Monoclonal Antibody	MAB106P	Pregnancy	ELISA / WB	
Human Chorionic Gonadotropin- Beta (hCG-Beta) Monoclonal Antibody	MAB107P	Pregnancy	ELISA	
Human Chorionic Gonadotropin- Intact (hCG) Monoclonal Antibody	MAB105P	Pregnancy	ELISA / WB	
Human Prolactin Monoclonal Antibody	MAB121P	Pregnancy	ELISA	
Human Prolactin Monoclonal Antibody	MAB122P	Pregnancy	ELISA	
Progesterone Monoclonal Antibody	MAB234P	Pregnancy	ELISA (competitive)	
Progesterone Monoclonal Antibody	MAB235P	Pregnancy	ELISA (competitive)	
Progesterone Monoclonal Antibody	MAB286P	Pregnancy	ELISA (competitive)	
AMH Monoclonal Antibody	BM459-P2B4	Pregnancy	CLIA / ELISA / LF	Capture Can be paired with BM459-S4E8
AMH Monoclonal Antibody	BM459-S4E8	Pregnancy	CLIA / ELISA / LF	Detector Can be paired with BM459-P2B4
3,5,3'-Triiodothyronine (T3) Monoclonal Antibody	MAB124P	Thyroid	ELISA (competitive)	
Human Thyroid-Stimulating Hormone Alpha (hTSH-α) Monoclonal Antibody	MAB132P	Thyroid	ELISA	Capture / Detector
Human Thyroid-Stimulating Hormone-Beta (hTSH-β) Monoclonal Antibody	MAB128P	Thyroid	ELISA	Detector
Human Thyroid-Stimulating Hormone-Beta (hTSH-β) Monoclonal Antibody	MAB130P	Thyroid	ELISA	Capture / Detector
T3 Monoclonal Antibody	BM440-P3H6	Thyroid	ELISA	Capture

Monoclonal antibodies

Infectious Disease & Biothreat Infectious Antibodies

Product description	Product code	Category	Application	Capture / Detector
Adenovirus Monoclonal Antibody	MAB604P	Adenoviral infections	ELISA / IFA / LF / WB	Capture Can be paired with MAB605P
Adenovirus Monoclonal Antibody	MAB605P	Adenoviral infections	ELISA / IFA / LF / WB	Detector Can be paired with MAB604P
Bacillus Anthracis Monoclonal Antibody	BBIO08	Biothreat infectious	ELISA / LF	
Burkholderia Monoclonal Antibody	BBI158	Biothreat infectious	ELISA / LF	
Yersinia Pestis Monoclonal Antibody	BBI190	Biothreat infectious	ELISA / LF	
Brucella Monoclonal Antibody	BBIO63	Biothreat infectious	ELISA / LF	
Brucella Monoclonal Antibody	BBIO71	Biothreat infectious	ELISA / LF	
Anti-Burkholderia Mouse Monoclonal Antibody	BBI159	Biothreat infectious	ELISA / LF	
Coxiella Monoclonal Antibody	BBI160	Biothreat infectious		
Coxiella Monoclonal Antibody	BBI162	Biothreat infectious		
Coxiella Monoclonal Antibody	BBI163	Biothreat infectious		
Coxiella Monoclonal Antibody	BBI214	Biothreat infectious	ELISA / LF	
Campylobacter Jejuni Monoclonal Antibody	MAB229P	Campylobacteriosis	ELISA	
Chikungunya Virus Monoclonal Antibody	MAB243P	Chikungunya	ELISA / WB	
Chikungunya Virus Monoclonal Antibody	MAB244P	Chikungunya	ELISA / WB	
Chikungunya Virus Monoclonal Antibody	MAB245P	Chikungunya	ELISA	
Dengue NS1 Monoclonal Antibody	MAB320P	Dengue fever		
Dengue NS1 Monoclonal Antibody	MAB321P	Dengue fever		
Dengue NS1 Monoclonal Antibody	MAB322P	Dengue fever		
Influenza A Monoclonal Antibody	BM500-5A4	Infectious Disease Antibody		
Influenza A Monoclonal Antibody	BM500-8F8	Infectious Disease Antibody		
Influenza B Monoclonal Antibody	BM501-1A2	Infectious Disease Antibody		
Influenza A/B Monoclonal Antibody	BM501-25F4	Infectious Disease Antibody		

Infectious Disease & Biothreat Infectious Antibodies

Product description	Product code	Category	Application	Capture / Detector
NS1 (Dengue) Monoclonal Antibody	BM339-P6C6	Dengue fever	LF	Capture / Detector Can be paired with BM339-T3H2
NS1 (Dengue) Subtype 2 Monoclonal Antibody	BM339-T3H2	Dengue fever	LF	Capture / Detector Can be paired with BM339-P6C6
Ebola Zaire Monoclonal Antibody	BM431-V1D1	Ebola	LF / WB	
Ebola Zaire Monoclonal Antibody	BM431-M4B1	Ebola		
Helicobacter Pylori Monoclonal Antibody	MAB807P	Gastrointestinal infections	ELISA	Capture / Detector (self-pairing)
Norovirus Monoclonal Antibody	MAB224P	Gastrointestinal infections	ELISA	
Norovirus Monoclonal Antibody	MAB225P	Gastrointestinal infections	ELISA	
Norovirus Monoclonal Antibody	MAB226P	Gastrointestinal infections	ELISA	
Norovirus Monoclonal Antibody	MAB227P	Gastrointestinal infections	ELISA	
Norovirus Monoclonal Antibody	MAB228P	Gastrointestinal infections	ELISA	
Norovirus Monoclonal Antibody	MAB242P	Gastrointestinal infections	ELISA	
Rotavirus Monoclonal Antibody	MAB606P	Gastrointestinal infections	ELISA / WB	Capture / Detector (self-pairing)
C.difficile GDH Monoclonal Antibody	MAB294P	Gastrointestinal infections	ELISA	Capture Can be paired with MAB295P
C.difficile GDH Monoclonal Antibody	MAB295P	Gastrointestinal infections	ELISA	Detector Can be paired with MAB294P
Norovirus Monoclonal Antibody	BM349-G1G1	Gastrointestinal infections	LF	Capture

Monoclonal antibodies

Inflammation Markers

Product description	Product code	Application	Capture / Detector
Ferritin Monoclonal Antibody	BM210-P3A8	ELISA	Detector
Rabbit Ferritin Polyclonal Antibody	BP230-3		
Ferritin Monoclonal Antibody	MAB290P	ELISA	Capture / Detector (self-pairing)
Procalcitonin Monoclonal Antibody	BM448-K8C7	ELISA	Capture / Detector Can be paired with BM448-V4A1
Procalcitonin Monoclonal Antibody	BM448-V4A1	ELISA	Capture / Detector Can be paired with BM448-K8C7 and BM448-H9F1
CRP Monoclonal Antibody	MAB326P	ELISA / LF	Self-pairing or can be paired with MAB327P
CRP Monoclonal Antibody	MAB327P	ELISA / LF	Can be paired with MAB326P as capture or detector
Human Lactoferrin Monoclonal Antibody	MAB232P	ELISA	Capture / Detector Can be paired with MAB233P
Human Lactoferrin Monoclonal Antibody	MAB233P	ELISA	Capture / Detector Can be paired with MAB232P
IL-6 Monoclonal Antibody	MAB342P	ELISA / LF / CLIA	Capture / Detector Can be paired with MAB343P
IL-6 Monoclonal Antibody	MAB343P	ELISA / LF / CLIA	Capture / Detector Can be paired with MAB342P

Renal Markers

Product description	Product code	Application	Capture / Detector
Renin Monoclonal Antibody	BM438-K9C2		
Renin Monoclonal Antibody	BM438-S4D2		
HbA1c Monoclonal Antibody	BM300-H2E2		

Explosives/Biothreat

Product description	Product code	Category	Application	Capture / Detector
PETN Monoclonal Antibody	EW75A	Explosives	ELISA / LF	
Anti-RDX Mouse Monoclonal Antibody	EW75B	Explosives	ELISA / LF	
Anti-TNT Mouse Monoclonal Antibody	EW75C	Explosives	ELISA / LF	

Antibody development

BBI offers expert partnership in the development of monoclonal, or polyclonal development and production of antibodies.

An industry-leading advantage, 'MultiPure' allows customers to see assay performance data eight weeks sooner than typical developments and use that data to inform clone selection.

Development & production

- Monoclonal antibody development
- Polyclonal antibody development
- In-vitro antibody production

Purification

- Protein A purification
- Protein G purification

Characterisation

- ELISA
- Western Blot
- SDS-PAGE
- Isoelectric Focusing (IEF)
- Endotoxin testing
- Matched pair evaluation
- SEC
- Cellular imaging
- Immunohistochemistry (IHC)

Feasibility

- Antigen analysis**
Option to receive a custom report, prepared by an immunologist, to identify the right antigen strategy for any goal.
- Detailed project plan**
Identify goals, reagents, screening strategies and set contingency plans to ensure timely development.
- MultiPure**
Generate up to 1 mg of discovery-grade purified antibodies from fusion candidates during hybridoma development to select clones based on end use performance.
- Characterization assays**
Characterize antibody candidates beyond standard indirect ELISA screening, so that only the right antibodies go to subcloning.
- Technical support**
Hands-on support from project managers, technical sales team and immunology experts at every project milestone.

Our preferred partner – offering the full service solution to our customers.

BioAgilytix - Pharma

BioAgilytix is the trusted partner for bioanalytical services throughout every phase of the drug development process. As a leading global bioanalytical laboratory, the company provides established and emerging pharmaceutical and biotechnology organizations with pharmacokinetic (PK), immunogenicity, biomarker, and CMC bioanalytical testing services in a GxP environment. BioAgilytix maintains state-of-the-art laboratories in Durham, North Carolina; Boston, Massachusetts; San Diego, California; Melbourne and Brisbane, Australia; and Hamburg, Germany.

For more information, please visit: www.bioagilytix.com

Antibody development

Accelerate timelines

Timely development is a high priority for most antibody development customers. With thorough project planning, rapid immunization protocol (RIMMS), and efficient data analysis at every project milestone, we work together with you to accelerate project timelines. When goals change during the course of development, excellent planning and communication allow BBI to be agile in making decisions and change the pathway to allow a project to remain on track, meet new goals, and get the right result more quickly.

A typical project plan*

	1-2 WEEKS	4 WEEKS		2-3 MONTHS		6-8 WEEKS	1-2 WEEKS
Phase	Planning	Immunisation	Fusion	General discovery reagents	Advanced screening	Subcloning & productions	Monoclonal assays
Activity	Antigen review Project planning	RIMMS protocol Serum screening	Primary screening Scale-up and cryopreservation of fusion product selections Secondary screening	MultiPure technology offers novel early access to purified samples	Matched pair evolution Blocking assays Matrix evaluation	Top-ranked fusion products subcloned Monoclonal cell line cryopreservation cGMP <i>in vitro</i> production	Analytical characterisation of antibody(s) Fit-for-use performance evaluation
Deliverables	• Antigen analysis report • Project plan	• Serum titre data • Boosting strategy (if needed)	• Screening data • Banked cryo-vitals • Supernatant	• Discovery-scale purified antibody • Biotin-labelled conjugates (optional)	• Advanced screening report • Subcloning candidates identified	• Screening data • Assessment of stability • Pilot production recommendations	• Screening data • Assessment of stability • Performance characterisation report summary

* Representative

What you can expect from BBI

Advanced screening capabilities

MultiPure allows customers to select clones based on specificity, sensitivity, matched pair compatibility, matrix compatibility, diversity and native recognition.

ISO13485:2016 manufacturing standards

Our ISO13485:2016 certified *in vitro* antibody manufacturing and custom production options to secure long-term supply management.

Knowledge and experience

Our antibody technical team brings over 30 years of deep expertise in immunology, antibody and immunoassay development to every project.

Unparalleled customer communication

Customers are informed at all project stages of the data and analysis they need to make goal-driven decisions.

Serum & plasma

Whether you need a clean base for calibrators or a disease-state pool for positive controls, our ethically sourced human serum and plasma come from one of our ISO 13485-certified facilities, licensed to store human tissue by the UK Human Tissue Authority.

Off-the-shelf formats include normal pools, vitamin-D-depleted serum and other analyte-adjusted matrices, alongside selected high-titre disease-state units – each qualified for IVD use and produced under controls designed to deliver consistent performance.

Need something bespoke?

Our technical team can source, characterize and prepare custom matrices – right down to the analyte profile and your specified fill volumes – to fit your workflow.

Serum & plasma

Disease State Serum

Product code	Product description	Category	Disease	Matrix available	Source
SH285-2	First Trimester Pregnancy Serum			Off-clot Serum	Europe
SH284-2	Third Trimester Pregnancy Serum			Off-clot Serum	Europe
SH252-9	Synthetic Rubella IgM Serum	Infectious Disease	TORCH	Spiked defibrinated Plasma	Europe

Analyte Depleted Serum

Product code	Product description	Category
SF236-7	Steroid-Depleted Processed Serum	Hormones
SF518-7A	Testosterone-Depleted Serum	Hormones
SF231-7	T3/T4-Depleted Processed Serum	Hormones
SF142-7	Immunoglobulin G-Depleted Processed Serum	Immunoglobulin
SF505-2	Immunoglobulins-Depleted Serum	Immunoglobulin
SF504-7A	Vitamin D-Depleted Processed Serum	Vitamins

Custom options and development products available.
Examples include Iron-Depleted, Insulin-Depleted, Ferritin-Depleted, Hormone-Depleted, TSH/T3/T4-Depleted.

Gold nanoparticles & conjugates

50

51

05

We have been supplying high quality gold nanoparticles and fully optimized gold conjugates for over 30 years, enabling the development of robust, reliable assays and consistent results time after time. Providing a uniform shape and standard size, with a CV of <8%, our gold colloid is available in a variety of sizes from 20nm - 250nm with batch volumes ranging up to 350L.

Gold nanoparticles & conjugates

Gold Starter Packs

BBI Quality

BBI's unique manufacturing technique allows for the production of large batches of gold to a high level of reproducibility of size, dispersion and shape. This ensures a firm foundation for conjugation and peace of mind that your rapid assays will provide reliable results. This is not the case for all gold nanoparticles.

Why BBI?

Used in over 400 million assays every year, our gold manufacturing technique guarantees high-quality products.

- Uniformity** with ≤5% odd shapes and a CV of ≤8%, the uniform shape and size of BBI gold ensure even antibody binding, giving reliable results in your assays.
- High stability** – a minimum one year shelf life ensures a settled test manufacturing regime, saving you time and wastage.
- Scalability** – our batch sizes go up to 340L (40nm) to ensure you have continuous supply.
- Quality** – BBI gold must pass strict quality procedures before it's released to our customers, guaranteeing impressive performance characteristics at scale.

Surface modification & labelling

We offer tools for the functionalization of various surfaces and assay types using our own high-tech molecule Polystreptavidin R, which we developed with exceptional biotin binding capacities. For protein labelling, we also offer recombinant Streptavidin.

Streptavidin & Polystreptavidin R

Product code	Product description	Package size	Category
10 110 010	Recombinant Streptavidin	Varied	Streptavidin
10 120 100	Polystreptavidin R	Varied	Polystreptavidin R

Polystreptavidin

Polystreptavidin R is a macromolecule with excellent adsorption properties. Coatings made of Polystreptavidin R combine the excellent biotin binding capacity with high chemo- and thermostability, thereby making your lateral flow test or other assay highly durable.

Because of its macromolecular structure, Polystreptavidin R has the ability to bind simultaneously more biotinylated molecules (Figure 1B) than 'classical' Streptavidin (Figure 1A). This leads to signal amplification in various applications (Figure 1C).

Key benefits

- High thermal stability - long shelf life > 2 years
- Ready-to-use - no additional washing or blocking steps required
- High signal-to-noise ratio
- Excellent coating properties - even on glass

Figure 1A

Figure 1B

Figure 1C

Surface functionalization with BBI's unique TAPAS labelling system

The TAPAS labeling Kit for immobilization, enrichment and detection of biomolecules on lateral flow test and on other assay systems.

TA-PAS system components and kits

Product code	Product description	Package size	System component
12 700 003	PAS Antibody	1 mg	Capture antibody
20 700 001	PAS-Poly-HRP PAS capture antibody conjugated with Poly-HRP		Capture antibody
BTTAP-001	TAPAS Labelling Kit -1 label		Labelling kit
BTTAP-003	TAPAS Labelling Kit -3 label		Labelling kit

Custom conjugation

Our custom conjugation service provides high-quality conjugates, optimized to meet your unique quality control requirements. Our experienced scientists work directly with you to provide sensitive, specific, and reproducible conjugates.

The service

- Develop high quality conjugates using antibodies, antigens, oligos or aptamers provided by you or sourced by us.
- Conjugate to numerous nanoparticles, including BBI's world-renowned gold.
- Optimize the sensitivity of your conjugate to meet your pre-agreed requirements and stability.
- Batch production up to 24 litres at OD10, or alternatively we can provide a custom OD preparation.

Designed to meet your individual needs

Specificity, sensitivity and reproducibility should define the specification and fulfil your absolute minimum expectations of the conjugate.

Our scientists work in partnership with customers to bring all the vital ingredients together and provide sensitive, stable, reproducible conjugates time after time. Once you are happy with your conjugate, we can put a commercial supply plan in place to ensure security of supply.

Discuss your requirements with our technical team on:

+44 (0)1495 363 000
sales@bbisolutions.com

The gold and conjugation processes at BBI are unrivalled – we found that BBI was the best that we could work with.

CEO James Lousararian,
Verax Biomedical

Immuno- affinity columns

Our immuno-affinity columns give you rapid one-step clean-up of vitamins, mycotoxins, hormones, and antibiotic residues in food and feed-safety workflows.

Choose single-analyte cartridges, or the AOZDFT combi column that captures six major mycotoxins at once. Keep throughput high with packs of up to 100 columns.

Need a custom target?

Our IAC kit couples your antibody to pre-activated gel and ships ready-to-pack columns, all under ISO 13485-certified production – so you stay in control from clone to clean-up.

Immuno-affinity purification & protein extraction

BBI offers a range of IAC (Immuno-affinity chromatography) columns for mycotoxin and vitamin analysis for food and feed safety assessment.

- Mycotoxins
- Vitamins
- Hormones
- Antibodies

Stabilizers, blockers & dilutents

We supply Surmodics® blockers and stabilisers alongside BioFX® TMB, ABTS and p-NPP substrates to customers across the EU. Each ready-to-use, or easily diluted, formulation is engineered to do two jobs at once: guard native protein structure for long-term shelf life, and seal off assay surfaces to drive down background signal.

Stabilizers, blockers & diluents

Immunoassay Stabilizers / Blockers*

SC01-1000 1,000 ml	StabilCoat® Immunoassay Stabilizer Effectively preserves the conformation and activity of dried proteins	ST01-1000 1,000 ml	StabilBlock® Immunoassay Stabilizer Minimizes non-specific binding to lower detection limits and maximizes signal-to-noise ratios of immunoassays
SC05-1000 1,000 ml	StabilCoat® Immunoassay Stabilizer (5x) 5x concentrate Effectively preserves the conformation and activity of dried proteins	ST01-CF01-1000 1,000 ml	StabilBlock® Immunoassay Stabilizer-CMIT/MIT Formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative
SC01-1000 1,000 ml	StabilGuard® Immunoassay Stabilizer (BSA-Free) Maintains the activity of antibodies and other biomolecules absorbed or immobilised to solid substrates		

* Distributed in Europe only

Stabilizers for Microarray Slides and Microsphere-based Assays*

SG02-1000 1,000 ml	StabilGuard® Plus Microarray Stabilizer Improves the stability of proteins bound to microspheres stored in solution, and array proteins stored in the dried state	SG02-1000 1,000 ml	StabilGuard® Choice Microarray Stabilizer (BSA-Free) Improves the stability of proteins bound to microspheres stored in solution, and array proteins stored in the dried state
-----------------------	---	-----------------------	--

Protein and Conjugate Stabilizers*

SA01-1000 1,000 mL	StabilZyme® AP Conjugate Stabilizer Developed specifically for Alkaline Phosphatase (AP) conjugates in solution	SA01-CF01-1000 1,000 mL	StabilZyme® AP Conjugate Stabilizer-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative
SAPF-1000 1,000 ml	StabilZyme® Protein-Free AP Stabilizer Optimized to prevent the loss of Alkaline Phosphatase (AP) activity while maintaining the conformational structure and binding efficacy of the conjugated antibody	SZ02-CF02-1000 1,000 ml	StabilZyme® HRP Conjugate Stabilizer Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative
SAPF-1000 CF01-1000 1,000 ml	StabilZyme® Protein-Free AP Stabilizer-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative	SZ03-1000 1,000 ml	StabilZyme® SELECT® Stabilizer Stabilises biologically active components in solution and protects the activity of proteins commonly used in immunoassays, such as antisera and controls and HRP conjugates

* Distributed in Europe only

Stabilizers, blockers & diluents

Protein and Conjugate Stabilizers*

SZ02-1000 1,000 ml	StabilZyme® HRP Conjugate Stabilizer Developed specifically for Horseradish Peroxidase (HRP) conjugates in solution	SZ03-CF02-1000 1,000 ml	StabilZyme® SELECT® Stabilizer-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative
SZ04-1000 1,000 ml	StabilZyme® NOBLE Stabilizer (BSA-Free) Designed for conjugated proteins, antibody-coated particles, and unmodified proteins in solution	SZPF-1000 1,000 ml	StabilZyme® Protein-Free Stabilizer Designed for conjugated proteins, antibody-coated particles and unmodified proteins in solution Delivers top performances in a protein-free formulation
SZ04-CF02-1000 1,000 ml	StabilZyme® NOBLE Stabilizer (BSA-Free)-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative	SZPF-CF01-1000 1,000 ml	StabilZyme® Protein-Free Stabilizer-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3(2H)-isothiazolone and 2-Methyl-3(2H)-isothiazolone as preservative

StabilBlot™ Blockers*

SB01-1000-01 1,000 ml	StabilBlot™ Protein-Free Blocker Ready to use The absence of protein in the formulation provides a synthetic alternative that eliminates cross- reactivity and increases sensitivity	SB05-0125-01 125 ml SB05-1000-01 1,000 ml	StabilBlot™ Casein Blocker (5X, TBS) 5x concentrate For strong blocking of background, a casein TBS and a casein PBS formulation are available
SB04-0125-01 125 ml SB04-1000-01 1,000 ml	StabilBlot™ Milk Blocker (10x) 10x concentrate For the strongest blocking, the milk formulation is recommended		

* Distributed in Europe only

Blockers and Diluents*

PBSC 100 ml 1,000 ml	Phosphate Buffered Saline/Casein Block and Diluent 5x concentrate High blocking efficiency of casein minimizes non-specific interactions of the secondary reactants with unwanted binding sites	MLKB 100 ml 1,000 ml	Borate Buffered Saline Milk Blocking Solution 10x concentrate Contains non-fat dry milk (NFDM) and serves as blocking reagent when diluted in reagent quality water
TBSC 100 ml 1,000 ml	Tris Buffered Saline/Casein Block and Diluent 10x concentrate High blocking efficiency of casein minimizes non-specific interactions of the secondary reactants with unwanted binding sites		

Sample / Assay Diluents*

SM01-1000 1,000 ml	Surmodics® Assay Diluent (Protein-Free) Surmodics® Assay Diluent reduces matrix interference in samples including heterophilic antibodies, such as HAMA and RF	SM02-1000 1,000 ml	MatrixGuard™ Diluent Provides unsurpassed blocking whereby matrix interferences are effectively blocked while the intended assay signal is maintained
SM01-CF02-1000 1,000 ml	Surmodics® Assay Diluent (Protein-Free)-CMIT/MIT Newly developed formulation containing a mixture of 5-Chloro-2-Methyl-3 (2H)-isothiazolone and 2-Methyl -3(2H)-isothiazolone as preservative		

* Distributed in Europe only

Immunoassay substrates

Immunoassay substrates

TMB and ABTS HRP Microwell Substrates*

TMBDH-1000-01 1,000 ml	TMB High Definition One Component HRP Microwell Substrate Our newest TMB formulation Up to 30% more sensitive than TMBS	TMBC-1000-01 1,000 ml**	TMB Conductivity One Component HRP Microwell Substrate As robust as TMBW Formulated specifically for liquid level detection systems on instruments Up to 10% more sensitive than TMBW
TMBS-1000-01 1,000 ml**	TMB Super Sensitive One Component HRP Microwell Substrate Up to 40% more sensitive than TMBW	TMSK-1000-01 1,000 ml**	TMB Slow Kinetic One Component HRP Microwell Substrate A slower kinetic formulation to allow a wider dynamic/working range without compromising assay performance Up to 25% less sensitive than TMBW
TMBW-1000-01 1,000 ml**	TMB One Component HRP Microwell Substrate Our most popular formulation Suitable for use in virtually every quantitative or qualitative test		

TMB and ABTS HRP Microwell Substrates*

TTMB-1000-01 1,000 ml**	TMB Super Slow One Component HRP Microwell Substrate Up to 35% less sensitive than TMBW without compromising assay performance	TMBX-1000-01 1,000 ml**	TMB Extended Range HRP Microwell Substrate Our slowest kinetic option for extended dynamic range and improved reproducibility
TMDS-1000-01 1,000 ml**	TMB Double Slow One Component HRP Microwell Substrate A doubly slow kinetic option for consistent results Up to 60% less sensitive than TMBW	ABTS-1000-01 1,000 ml**	ABTS One Component HRP Microwell Substrate - Extended Shelf Life Three-year stability while offering the sensitivity needed for your ELISA assays Much more stable background compared to standard ABTS formulations

* Distributed in Europe only ** Bulk and custom fills on request

TMB HRP Membrane Substrates*

ESPM-1000-01 1,000 ml**	TMB Enhanced One Component HRP Membrane Substrate Room temperature stability for 2 years, stable for 4 years at 4°C Similar sensitivity to most mid-to high-level chemiluminescent membrane substrates Extended dynamic range with reduction of wash-out at higher peroxidase concentrations	TMBM-1000-01 1,000 ml**	TMB One Component HRP Membrane Substrate A high quality and economical precipitating TMB option for Western blotting and other membrane applications
-----------------------------------	--	-----------------------------------	--

AP Microwell Substrates*

PNPS-1000-01 1,000 ml**	AP-Yellow One Component Microwell Substrate (pNPP) with Stabilizing Pellets No spontaneous colour change Long shelf life
-----------------------------------	---

AP Membrane Substrates*

BCIB-1000-01 1,000 ml**	BCIP/NBT Blue One Component AP Membrane Substrate Blue precipitate No unpredictable colour change Improved sensitivity with low background	BCID-1000-01 1,000 ml**	BCIP/NBT Purple One Component AP Membrane Substrate Purple precipitate No unpredictable colour change Improved sensitivity with low background
-----------------------------------	--	-----------------------------------	--

Accessory reagents

Wash and Coating Solutions

WSHW 100 ml 1,000 ml	Tris Buffered Saline Wash Solution 10x concentrate Performs stable blocking once applied and reduces non-specific binding Improved sensitivity with low background	COAT 100 ml 1,000 ml	ELISA Plate Coating Solution Purple precipitate Physiological saline solution, maximizes specific binding to the target solid phase by providing optimal pH and ionic strength in ELISA systems
-----------------------------------	--	-----------------------------------	--

* Distributed in Europe only ** Bulk and custom fills on request

Lateral flow contract manufacturing services

09

Scaling your lateral flow test from pilot to production is complex. We simplify it. In our ISO 13485-certified cleanrooms, automated lines stripe, laminate, cut, and assemble your devices – from pilot lots to multi-million commercial runs.

We pack complete kits on-site – buffers, swabs, desiccants, and IFUs – so you get one audit-ready lot and a single supply chain.

Need regional release testing or custom packaging?

We build these into your workflow, so your product ships market-ready from day one.

Lateral flow contract manufacturing services

Market segments

Our experience has been gained across multiple sectors including:

Human Clinical
- Lab based
- Point of care
- Remote
Agricultural
Animal Diagnostics
Environmental
Drugs of Abuse
Food Safety
Defence
Consumer Healthcare

Robust and flexible manufacturing options

You may be a new start-up company looking for someone to manufacture your assay, or a fast growing company under pressure to meet increasing demand. Our manufacturing service will deliver the results you need to fulfil your customer’s expectations:

Key benefits
Flexible options – catering for increased demand and technically challenging manufacture
Technical transfer to manufacturing – BBI has extensive experience and expertise in successfully transferring IVD products to manufacturing
Competitive product pricing – using our automation capabilities to manufacture on a large scale will drive production costs down without compromising quality
Quality system certification – we’re certified to the world recognised Quality System for Medical Device and IVD Manufacturers, ISO 13485 and have experience working on FDA projects

Development Partners – BBI works with our partners to offer end to end lateral flow development and manufacture

Global Access Diagnostics

Global Access Diagnostics (GADx) is a mission-led, end-to-end developer of rapid immuno-diagnostic devices for human, veterinary, and agricultural applications. We combine scientific excellence with a strong commitment to global health, local manufacturing, and impact-driven programmes.

Originally part of a privately held organisation, GADx became a social enterprise in 2021 following its acquisition by a group of philanthropic stakeholders, including ELMA Philanthropies, Open Society Foundations, Skagen, and the Sapling family investment groups. As a social enterprise, GADx is dedicated to reinvesting its profits to improve the health and well-being of underserved populations worldwide.

With deep expertise in lateral flow and rapid diagnostics, GADx offers comprehensive services including product design and development, technology transfer, regulatory support, and clinical evaluation tailored to both commercial and global health partners.

To learn more, visit our website: www.globalaccessdx.com or contact us at info@globalaccessdx.com

Lateral Dx

Lateral Dx offers expert lateral flow assay development, combining cutting-edge technical knowledge with a strong commitment to quality.

We provide tailored lateral flow test development and consultancy services across a diverse range of industries. Our goal is to deliver high-quality, cost-effective solutions that meet your specific needs. With over 25 years of experience in the lateral flow assay field, we support every stage of your development journey - from initial proof-of-concept studies to scaling up for large-scale manufacturing. Our skilled team brings extensive expertise in rapid test development across sectors, including veterinary, human clinical, environmental, and toxicology.

To explore case studies from our business partners or learn more about the industries we serve, visit our website: www.lateraldx.com or contact us to speak with our team: www.lateraldx.com/contact-us/

Notes

[illegible]This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Notes

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across the entire width of the page, typical of notebook or primary school writing paper. There are no margins, text, or other markings present.
